ARGOS DISTRIBUTORS LTD. CATALOGUE No 8, AUTUMN 1977

Britain's best shopping deal.

This catalogue is just today's revolutionary new way of saving.

Here's why.

The Argos shopping system combines 11 clear advantages:

1. A catalogue that makes it easy for your family to choose the best buys in the space of just one hour.
2. Home-to-office, office-to-office deliveries, where you can buy the best. Shoppers' addresses are listed on the back cover.
3. A wide, exciting range with thousands of services.
4. The reliability of trusted products from famous household names you trust.
5. A money-back guarantee of satisfaction.
6. That's about all...

But there's still...

Dramatic savings.

Argos has low prices come from a completely new shopping habit.

1. Our entire store has shop space. So we save on rent and other big expenses.
 2. Computerized ordering means no extra costs again.
 3. Lower prices mean we sell more. So we pass them back to you.
- All this adds up to a factor double for the customer. It means big savings for you.

No hidden extras.

Argos prices already include VAT so there's no extra "hidden" cost to pay.

But remember that while every possible effort will be made to ensure these low prices, but not against the date passed, we agree your right to order afterwards in the event of VAT changes as for any other goods beyond our control—so please, check the Master Catalogue in your Argos Magazine.

It's easy to save money the Argos way.

Once you've chosen your best buys from this catalogue, make your purchase at your local Argos Store. Many items from the catalogue are on display—and each Store has a large window, so you can see them in person. Argos staff are there to serve you and help if required.

In the Storehouse you supply an easy selection form for the items you want. Just fill in the catalogue number and the quantity required in phone to the example. An assistant will then check your selection form.

Collect and take home.

The items you have selected will be brought from the warehouse where you make your purchase. Then simply take them home.

Cheques/Credit cards.

Cheques up to £25 will be accepted immediately if accompanied by a Banker's Card. You may use Debits or the Cheque to purchase goods at any Argos Storehouse.

1. *Staphylococcus aureus* (S. aureus) is a Gram-positive, spherical bacterium that is commonly found on the skin and in the nose of humans and animals. It is a facultative anaerobe, meaning it can grow with or without oxygen. S. aureus is a major cause of skin infections, such as abscesses, boils, and impetigo. It can also cause more serious infections, such as pneumonia, sepsis, and food poisoning. S. aureus is resistant to many antibiotics, making it a difficult pathogen to treat.

It's always better to have a "friendly" relationship with your neighbors than to have a "hostile" one. If you have a friendly relationship, you can help them in a variety of ways. For example, you can help them with their homework, or you can help them with their chores. If you have a hostile relationship, you can't help them in any way. So, it's always better to have a friendly relationship with your neighbors.

It's always better to be safe than sorry. That's why you should always wear your seat belt. And if you're driving, don't drink and drive. It's the only way to stay safe. For more information, call 1-800-4-A-SAFE. Or visit us online at www.4asafe.org. Because when it comes to staying safe, there's no such thing as a free ride.

2. *Can I transfer my property to a trust?* Yes, you can. But you must be careful to do it properly. If you don't, you may lose the protection of the trust. For example, if you transfer property to a trust and then die, the property will be treated as if it were still yours for estate tax purposes. This is called the "Crummey" rule. To avoid this, you must make the transfer in a way that is not a "transfer for value." This means you must not receive any benefit from the transfer. 1. Molecular Weight Estimation: The M_n and M_w are calculated using GPC. The M_n is calculated using the formula $M_n = \sum (M_i \cdot N_i) / \sum N_i$, where M_i is the molecular weight of the i th peak and N_i is the number of molecules of that peak. The M_w is calculated using the formula $M_w = \sum (M_i^2 \cdot N_i) / \sum (M_i \cdot N_i)$.

The Hawthorne effect is named after Leta McGraw, who conducted a series of experiments on the Hawthorne Works in the 1920s. The Hawthorne effect is a social psychological phenomenon that occurs when individuals change their behavior in response to being observed or when they are part of a group. The Hawthorne effect is often used to explain the results of experiments in which participants perform better when they are being observed than when they are not being observed. The Hawthorne effect is also used to explain the results of experiments in which participants perform better when they are part of a group than when they are alone.
